

HIMANI YADAV

37 Forest Dale Dr, Barrie, ON L4M6M7, (437) 453-8870/
hpyadav2002@gmail.com

Recent nursing graduate with a strong academic background and hands-on clinical experience in various healthcare settings. Passionate about delivering patient-centred care and equipped with the skills to assist in diagnosing, treating, and providing ongoing support for diverse patient populations. Recently passed the NCLEX-RN and eager to contribute to a dynamic healthcare team. Known for strong communication, critical thinking, and collaboration abilities, with a commitment to continuous learning and improving patient outcomes.

SKILLS:

- **Patient Care & Assessment** - Conducting thorough patient assessments, including physical exams and monitoring vital signs to detect any changes in health status and provide appropriate care.
- **IV Insertion & Medication Administration** - Skilled in administering medications and fluids via intravenous lines, as well as oral and intramuscular medications, ensuring safe and accurate dosages.
- **Wound Care & Infection Control** - Proficient in managing wounds, including cleaning, dressing, and infection prevention, using sterile techniques to ensure patient safety.
- **Vital Signs Monitoring & Patient Evaluation** - Monitoring essential signs like blood pressure, temperature, and heart rate to assess patient health and identify any abnormalities requiring intervention.
- **Team Collaboration & Communication** - Strong interpersonal skills, working collaboratively with healthcare teams to deliver quality patient care and ensuring clear communication with patients and their families.
- **Critical Thinking & Problem Solving** - Using clinical knowledge and judgment to assess patient conditions, make quick decisions, and handle emergencies effectively.
- **Patient Education & Advocacy** - Educating patients about their conditions, treatments, and self-care, and advocating for their needs to ensure they receive optimal care and support.
- **Time Management & Multitasking** - Effectively managing multiple patient cases and tasks simultaneously, prioritizing based on urgency and ensuring timely care.
- **Infection Prevention & Safety Protocols** - Knowledgeable in infection control procedures, including the proper use of personal protective equipment (PPE) and following hospital safety standards to reduce risks.
